OVERSIZE:

You should consider the total volume of your package. If the total volume of the package is more than the related weight limit, you will need to pay extra fee. To get the total size of package please multiply the length-width-height in centimeters. Example: 30cm x 40cm x 50cm = 60,000 ccm. The courier has the right to calculate the total volume, and to charge the shipping costs to the surcharge.
